Dear Resident:

**RE: Cairns Storm Water Management Facility Upgrade  
Notice of Construction**

---

The Town of Beaumont would like to take this opportunity to inform all adjacent residents that there is construction planned for early 2017 on the Cairns Storm Water Management Facility.

Key details:

- Construction is planned from February 2017 to May 2017.
- The asphalt trail and 50 Ave north sidewalk within the site will be closed during construction.
- An upgrade to the existing site is needed to ensure safety during heavy rain events for Beaumont residents.

See Images on the back of this letter for the following details:

- Image 1 – existing site location including detour route and closures
- Image 2 – preliminary plan for the site

Other than the closed trail and sidewalk, there aren't expected to be any interruptions to residents' daily life.

Please call or email me at my contact information below if you have any questions regarding this project.

Sincerely,

Keaton Seaby, P. Eng.  
Project Manager
